

Hi Guys,

I have met & spoken to many of you but for those families whom I have not interacted with... this is me. Margaret Marriott, YouthCARE College Chaplain.

I work full time at Coastal Lakes College. I am available to parents on any school day and by email during the holidays if required.

Most people would understand my service is to provide support to our young people. It is not well known, that my service is extended to our families.

I may be able to offer support to families to access external agencies within the community during times when you face challenges regarding your family dynamic or the support your children may need.

Social and emotional wellbeing and mental health support, is the cornerstone of the support offered by the Chaplaincy service to our education community.

I have worked with the Student Support team & Principals to provide links to useful wellbeing sites to be accessed at home & communicated these via our Facebook page, websites & Compass.

If I can listen to, support or assist you, please just reach out 😊
